

From Tricia Setliff to prospective dental professionals:

We have an outstanding mission and vision for The Smile Centre. We provide ideal comprehensive aesthetic and restorative dentistry options to each and every one of our guests in addition to their comprehensive general dentistry needs. We rise to the challenge of giving each of our guests a more relaxed, comfortable, and pleasant dental experience than they've ever had.

We strive for the ideal and the best quality and have teams in each of our locations that are motivated and regularly trained to accomplish high-end high-tech dentistry. To this end, we push to stay on the cutting edge of the newest techniques and research as is exemplified by our uniqueness of having an in-house CAT scan. This equipment, combined with our other neuromuscular dentistry computerized technology, heightens our abilities and success rates in helping our guests having head and neck and TMJ pain to become pain-free and beautifully restored. Such a feat improves so many facets of our guests' life. They are so thrilled to finally have an "answer" to their discomfort that results in such a stunning aesthetic result! Many times the cosmetic dentistry achieved through full-mouth restoration is just an afterthought to them – a wonderful added bonus to the lasting pain relief provided!

In addition, we also provide regular "All Team" trainings to support and promote life and work skills essential to balancing life. We are fervent advocates for happy and strong family and personal lives for our team members, recognizing that these are what provide true feelings of accomplishment and peace.

We are also lucky enough to live in a beautiful area of sunny Florida. The west coast of Florida has so much to offer in outdoor adventures as well as intellectual and artistic endeavors. It lays claim to some of the best beaches in the world and has a non-stop array of theatre, art, circus, and community events. In essence, the area is booming! As an added plus Sarasota County is listed as the top Florida school district and consistently ranks highly nationally as well.

Dr. Stanley, our owner and visionary has thousands of hours of continuing education credits over his 20 years of practice, having recently completed over 370 of those hours in the last two year period. The majority of his recent CE hours have been achieved through the Las Vegas Institute for Advanced Dental Studies (LVI). You may recognize the "LVI" name from the TV show "Extreme Makeover."

Dr. Stanley has performed well over 20 full-mouth porcelain restorations in just the last two years, and prior to that, many in porcelain and PFM's as well and consistently produces over \$100K per month. Additionally, he routinely surgically places dental implants and bone grafts and has performed some sinus augmentations recently as well.

Dr. Stanley's passion is dentistry, and perhaps more importantly, sharing with our loyal associates the advanced learning and exceptional skills that he has acquired. His practice is 100% fee-for-service and our goal for The Smile Centre is to guide all our associate dentists to the same. Currently our associate dentists are listed as "in-network" with only 2- 3 Preferred Provider insurance companies, and we are continually working towards dropping those remaining few. We accept no HMO or Medicare insurances.

We choose to have each office and team small enough to promote a cozy, caring, personalized atmosphere for both our guests and our teams.

If you are motivated and interested in learning and being a part of a fantastically dynamic dental group, then we can certainly provide an excellent opportunity for mentorship with an option to buy-in/buy-out! Associate agreements are always congenially and respectfully discussed with a spirit of openness, yet a high degree of confidentiality.

Please call my cell (941-468-6902) or Dr. Stanley's cell (941-780-2393) or email us anytime with any questions you may have.
